TEXAS AERIAL ROBOTICS

Corporate Package

2025-2026

Empowering the future of autonomous flight at UT Austin

TEXAS AERIAL ROBOTICS

FROM OUR PRESIDENT

To Our Future Partner in Autonomous Flight,

Texas Aerial Robotics (TAR) is a multidisciplinary student organization at The University of Texas at Austin, dedicated to advancing autonomous aerial systems. Since our founding in 2017, TAR has grown into a dynamic team of engineers, designers, and innovators building fully autonomous drones for research and competition.

Our teams design custom hardware and develop advanced software systems that power our projects, such as propulsion and manipulators, simulation, and autonomous control. Members gain hands-on experience through challenges like the Raytheon Unmanned Aircraft Systems (UAS) University Innovation Showcase, preparing them to lead in aerospace, robotics, and AI.

TAR is more than a technical team—it's a launchpad for future leaders. Our collaborative, inclusive culture empowers students from all backgrounds to grow, build, and make an impact.

We invite you to support our mission. Your partnership helps us prototype bold ideas, host inclusive workshops, and represent UT Austin on national stages. In return, we offer meaningful engagement with top student talent and visibility across our platforms.

Thank you for considering a partnership with Texas Aerial Robotics. We're excited about what we can build together.

Hook 'em,

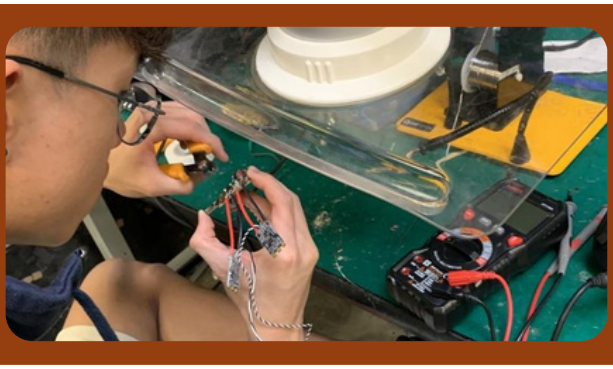

Arjun Bhatia

President | Texas Aerial Robotics
B.S. Aerospace Engineering | May 2026

TEXAS AERIAL ROBOTICS

What We Do

Our members work on:
⇒ Researching
⇒ Designing
⇒ Prototyping
⇒ Simulating
⇒ Testing

Competitions:
⇒ Annual Raytheon Competition
⇒ 3rd Place (2025)
⇒ International Aerial Robotics Competition (IARC)

Workshops:
⇒ Computer Aided Design
⇒ Embedded Systems
⇒ Electronics
⇒ ROS, Computer Vision, SLAM

Community Building:
⇒ Networking Events
⇒ Girls' Day
⇒ Gone to Engineering
⇒ Social Events

TEXAS AERIAL ROBOTICS

Impact & Testimonials

What have you gained from TAR?

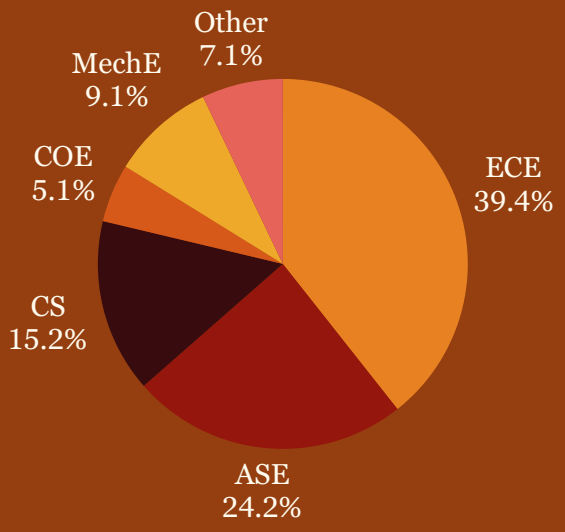

"I gained the opportunity to intern at LIFT Aircraft because they reached out to TAR for a collaboration to develop an autonomous casualty evacuation vehicle."
-Ethan Chua

How has TAR set you up for success?

"TAR allowed me gain experience with using Autopilot Software like PX4 and using simulators like Gazebo."
-Abhi Patil

TAR Major Composition

Where Our Members Go

Lockheed Martin **NASA**

Tesla **SpaceX**

Dell **NVIDIA**

Blue Origin **Texas Instruments**

TAR alumni contribute to innovation at leading aerospace, robotics, and tech organizations.

TEXAS AERIAL ROBOTICS

YOUR SUPPORT MAKES A DIFFERENCE

TAR is grateful for the partnerships that fuel our journey. Regardless of whether you help us with monetary assistance or component donations, we appreciate your company's commitment to cutting-edge research and education. Upon the receipt of your contribution, you will promptly receive a letter of appreciation.

Embark on this exciting adventure with us, and let's soar together into the future of autonomous technology. To learn more about our organization, we encourage you to visit our website: texasaerialrobotics.wixsite.com/website for more information. If you are interested in donating to TAR, please contact us or donate online: tinyurl.com/mkvmks3h Together, we are building tomorrow's innovation, one drone at a time!

Basic Package

Price: **$500**

Included

- **Listing on TAR website**

Standard Package

Price: **$1000**

Included

- Listing on TAR website
- **Scheduled Talk/Luncheon with TAR**
- **Invited to TAR general meetings**

Premium Package

Price: **$2000**

Included

- Listing on TAR website
- Scheduled Talk/Luncheon with TAR
- Invited to TAR general meetings
- **Receive TAR Merchandise**
- **Company Logo on TAR Research Project**

Make an impact on the future of engineering.
